POLICY MANAGEMENT FOR SMALL HEALTHCARE PROVIDERS

The surveyor asks which version you approved. *Show them.*

Bindersnap is where your policy manual lives. Every policy keeps its current approved version and **its own approval record: who signed off, when, and on exactly which version.**

HOW IT WORKS

01

Every policy, one place

Upload the Word and PDF files you already have, or write in Bindersnap. Staff get one link.

02

Sign-off that can't be back-dated

The approvers you name review each change. Each sign-off is stamped with name, date and version.

03

Evidence while they wait

Every version and who approved it is on the page while the surveyor is still in the room.

Built for small providers

- Ambulatory surgery centers
- Clinics & physician practices
- Home health
- Hospice
- Behavioral health
- Rural health clinics

Set up in an afternoon. No demo call, no implementation project.

$39 a month per writer

- Reviewers and staff readers are free
- 14-day free trial, no card
- Stop paying, still read and export it all
- Policies only, never patient data

WHY IT EXISTS

"My wife came home frustrated with her policy system often enough that I started asking questions. *She needed what software teams take for granted: a record of who approved which version. So I built it for her.*"
